

Spot a bad website. Earn \$299.

Revampify rebuilds outdated small-business websites on spec: we build the redesign first, free, and the owner pays only if they want it live. Your part is the spotting. Point us at a business whose website needs help, and if they buy the redesign we build, \$299 is yours.

1 Spot one

A local business whose website made you wince: a menu that is a photo of a printout, a page that will not load on a phone, or no website at all.

2 Send it in

Two minutes at revampifysolutions.com/refer. The business name, the town, and what you noticed is plenty. You never sell anything.

3 Get paid when they buy

We rebuild their site free and show them the finished thing. If they buy it, \$299 is yours.

The deal, in full

- **\$299 per closed deal, flat.** Whatever price the business pays, your reward is the same.
- **Paid after their payment clears.** Not when you submit. A lead that never turns into a sale earns nothing, and most will not.
- **A 14-day clawback.** If the client is refunded within two weeks, the payout comes back; in practice we net it against your next one.
- **First one in gets the credit.** If two people send the same business, the earlier submission wins. Businesses already talking to us do not count.
- **No quotas, no territories, no obligations.** Send one a year or one a week. Nobody will call you about your numbers.

How the money reaches you

By Zelle or bank transfer, from our business account, within about two weeks of the client's payment clearing. United States tax rules make us collect a signed IRS Form W-9 from you before your first payout, and if we pay you \$600 or more in a year we file a 1099-NEC for it. That is paperwork on our side, not a fee on yours.

One rule worth repeating: you are not our salesperson. You never quote a price, promise a timeline, or speak for us. "Can I pass your info along to a company that fixes websites?" is the whole job.
